PROFESSIONAL APPOINTMENTS

- 2020 – present **Assistant Professor**
Department of Economics and Business Economics, Aarhus BSS
Aarhus University, Denmark
- 2020 – present **Research Fellow, Danish Finance Institute**
- 2016 – 2019 **Postdoctoral Fellow (parental leave September-January 2019)**
Department of Economics, Lund University, Sweden

EDUCATION

- 2013 – 2017 **PhD in Economics**, Copenhagen Business School, Denmark

JOB MARKET PAPER

The Value of Mortgage Repayment Flexibility

with Peter van Santen and Patrick Moran

Reject and resubmit at the *Review of Financial Studies*

Abstract: We study the causal impact of amortization payments on household borrowing. We argue that forced amortization payments are costly in standard economic models and therefore affect credit demand. Exploiting notches in the Swedish amortization requirement, a macroprudential policy, we find that new borrowers reduce their loan-to-value ratios by 4-5 percent in response to a 1 percentage point higher amortization rate. We show that the effect is driven by lower borrowing and that a large share of borrowers lower amortization payments to avoid violating payment-to-income constraints. Our results are relevant for macroprudential policy and for understanding borrowers' mortgage choice.

GRANTS & AWARDS

- 2017 – 2020 Tom Hedelius and Jan Wallanders stiftelse. “The long and short term impact of amortization requirements”. 1.2 million SEK/€117.000. PI: **Bäckman**
- 2017 Think Forward Initiative Research Challenge Grantee. “Multi-level Marketing Participation and Social Connectivity”. €5.000. Co-PI: Bäckman, Claes & Hanspal, Tobin
- 2017 Research Center SAFE, Goethe University Frankfurt . “Economic Opportunity and Multi-level Marketing”. €3.000. Co-PI: Bäckman, Claes & Hanspal, Tobin

WORK IN PROGRESS

- First draft **Mortgage market design and wealth inequality: Evidence from interest-only mortgages in Denmark.**
with Danial Ali Akbari, Natalia Khorunzhina and Timo Trimborn
Key idea: Mortgage amortization require household to save and build up wealth in the form of home equity, but also restricts portfolio choice. We show that having more choice over mortgage payments reduces savings, with implications for wealth inequality

- First draft **The Value of Connections: Network Effects on Stock Market Participation**
with Olga Balakina and Anastasiia Parakhoniak
Key idea: Our aim is to understand why the explosion in social media use has not led to an increase in stock market participation. We study a model of stock market participation with a social network and a fixed participation cost that depends on the number of informed connections.
- Writing draft **Macroprudential policies do not affect homeownership**
with Olga Balakina and Timo Trimborn
Key idea: Macroprudential policies are a popular tool to limit credit growth, but may have unintended effects on access to homeownership. We show that such concerns are unfounded, and that macroprudential policies do affect homeownership rates either on the aggregate level or for selected groups.
- Writing draft **Can Credit Supply Shocks Affect the Entire Income Distribution?**
with Natalia Khorunzhina
Key idea: We argue that income is not always a good proxy for credit constraints, and show that credit supply shock also affect rich households.
- Writing draft **The impact of home equity withdrawal on house prices**
with Natalia Khorunzhina and Walter D’Lima
Key idea: Home equity withdrawal is often empirically used to fund home quality improvements. These quality improvements are not generally taken into account when constructing house price indices. We estimate how home equity withdrawal affects house prices using a long panel of the universe of housing transactions in Denmark.

OTHER PUBLICATIONS

- 2019 [Hur påverkar amorteringskravet hushållen? Lärdomar från Danmark.](#) *Ekonomisk Debatt, 2019 (The Journal of the Swedish Economic Association).*
